

Full-time and Internship Positions at Citigroup

Job Description

Full-time and internship positions are available at an automated proprietary trading group called Quantitative Strategies (QS) at Citi Alternative Investments (CAI) for the period of June through September of 2008. The intern will be working in the New York office on various state-of-the-art technology and trading applications. QS has a group of talented, motivated people to work on technology and variety of trading problems. This would be a great opportunity to learn, participate within and contribute to this group. Compensation, of course, is superior.

Quantitative Strategies

Quantitative Strategies (QS) is a multi-asset automated proprietary trading group within Citi Alternative Investments (CAI) that got created recently. QS is entirely technology, model and data driven with mandate to trade globally.

Citi Alternative Investments (CAI) is an integrated global alternative investments unit within Citigroup that manages a wide range of products across several asset classes. CAI manages capital on behalf of Citi, as well as third-party institutional and high net worth investors. For information about CAI, please visit: www.citigroupai.com

Requirements
