

## **Software Developers / Engineers (C# .Net)**

Career Level: Entry Level or Experienced

Status: Full Time, Employee

Intellicomm Inc., a unified communications services firm located in King of Prussia (a suburb of Philadelphia), PA, with emphasis on advanced internet, web and telephony software development applications, is looking for entry-level and experienced Software Developers.

We are looking for individuals who are excellent programmers, hard working, selfmotivated, quality conscious, responsible in meeting deadlines, problem solvers with a strong work ethic, and long term players. Individuals must be comfortable working in a challenging and fast-paced team environment.

We are looking for:

- proficiency in C# and .Net framework;
- excellent programming skills in Classic or .Net ASP;
- excellent programming skills in C++ and Windows APIs;
- experience in SOAP and Web Services;
- experience in COM, HTML, DHTML, XML/XSL, Javascript;
- experience in MS SQL Server or Oracle databases;
- strong object oriented programming skills;
- experience with Client/Server, n-tier architectures;
- strong oral and written communication skills;
- Telephony programming helpful, but not required;
- B.S. or M.S. in Computer Science / Telecommunications / Engineering.

Intellicomm is focused on developing the leading edge hosted unified communications service. To learn more about Intellicomm, please visit the company website at <http://www.intellicomm.com> or the service website at <http://www.innoport.com>.

Please send your resumes to **jobs@intellicomm.com** (Attachments as ASCII text, Microsoft Word or PDF format only). No phone inquiries or drop-ins please.

*Intellicomm Inc. does not discriminate against any qualified persons based on race, color, religion, national origin, age, sex, disability or veteran status in all its employment practices.*
