

Software Developers For Growing Internet Company

Intellicomm Inc., a unified communications services firm located in Philadelphia, PA, with emphasis on advanced telephony software development applications, is looking for entry-level and experienced Software Developers to develop various Internet based software applications. We are looking for individuals who are excellent programmers, hard working, self-motivated, quality conscious, responsible in meeting deadlines, problem solvers with a strong work ethic, and long term players. Individuals must be comfortable working in a challenging, fast-paced team environment and be able to multi-task in handling concurrent projects with shifting deadlines, both internal and client driven. Selected candidates will be responsible for:

- Internet Programming on the MS Windows Platform
- Web Applications
- Designing and optimizing databases
- Writing Technical Reports/Design Documents

Candidates must have experience with all or some of the below skills:

- C++ and Windows APIs
- Active Server Pages or Java Server Pages
- COM, DCOM
- HTML, DHTML, XML/XSL, Java
- MS SQL Server or Oracle databases
- object oriented programming
- client/server, n-tier architectures
- strong oral and written communication skills
- BS in Computer Science; MS in Computer Science preferred
- Telephony programming helpful, but not required

Intellicomm is focused on developing advanced integrated communications software. More information is available at <http://www.intellicomm.com> and <http://www.innoport.com>.

Please send your resumes to jobs@intellicomm.com (Attachments as ASCII text, Microsoft Word or PDF format only). No phone inquiries and no walk-ins please.
